

Verbal Number-Word Codes Answers

1. **B** You can tell from the codes that K = 2 as two words both end in K like two of the codes. Working from there you can see 1942 = PERK and 4862 = RANK thanks to positions of the 4 and the R and that DEAR = 5894.
2. **C**
3. **E**
4. **D**
5. **SULK** Work out from the position of the 2s. As both in second place in two words, could be either U or E looking at the words. Running through it doesn't work to be E so must be U. So RUST = 6245 and SULK = 4287 from the positions of the 4 and S.
6. **TEAM**
7. **8351**
8. **8345**
9. **A** Use the positions of the 1s and As to work out codes for LANE and REAL. L must = 6 and you can work everything out from there.
10. **A**
